2015 - 2016

- Built application using Flask.
- Designed new features.
- Designed database and performed migrations using Peewee.
- Integrated 3rd party APIs including Shippo and Stripe.
- Improved server performance using NGINX and Memcached.

Technologies

Languages

JavaScript, Python, SQL, HTML, CSS

Data

Postgres, DynamoDB

Frameworks

React, Redux, Node, Flask, Angular, React Native

Tools

Git, AWS, Jest, Yarn, Chrome DevTools, Webpack

Education

Portland State University

M.A., Mathematics

Ongoing

Clemson University

B.A., Computer Science, minor in Architecture

Projects

Ender

Learning management SDK providing services to gamify curriculum and combine the large scale of technology with one-on-one interaction.

Technologies: React Native, Solidity
